

2026 Membership Information

**Imagine if the transport you use to deliver programmes operate
with the same innovation, strategy, and impact-focus as the
missions they serve.**

This is the future that Fleet Forum is building.

We are a unique, independent **hub** driving systemic change in humanitarian fleet and **mobility management**.

Through our global community, we connect the aid and development sector, donors, academia, and the private sector to co-create smarter, safer, and more sustainable fleet systems — from training and best practice sharing to benchmarking and innovation.

Partnership is central to how we work.

Through our membership network, we connect NGOs, UN agencies, the Red Cross and Red Crescent Societies, private sector partners, donors, and academia to share knowledge, scale innovation, and collaborate to professionalise fleet and mobility management.

Provide E-Learning on Your Own Learning System

- Fleet Forum, in collaboration with UNHCR, has developed a series of fleet management e-learning modules for senior managers, transport managers and drivers.
- Covers a wide ranging of topics, from planning, fuel management, data analysis to disposal.
- E-learning available in English, French, Arabic and Spanish
- You can host these on your own learning management system. No additional costs.
- Fleet Forum will continue to update the modules and create new ones that members can access.
- Over 10 humanitarian member organisations have embedded these in their training strategy

Microlearning, Available from Your Smartphone

- Bite-sized training chunks so that learners get exposed to the content frequently (in some cases daily)
- Short modules (5-15 minutes) which you can take right from your phone (or your computer if you prefer)
- Interact with community of fleet managers and Fleet Forum experts by sharing photos and videos of the activities you implement
- Ask questions to the community
- 4 microlearning modules available for members:
 - Master Your Implementation Plan
 - Fleet Management Refreshers
 - SMART Planning
 - Be A Coaching Champion For Your Drivers

30-minute webinars

- Facilitated by Fleet Forum, supplier subject matter experts and humanitarian practitioners
- Different types of sessions: Ask the Expert, Masterclasses, Practical exercises, Food for Thought, Case studies and much more
- Free for Fleet Forum members. No limit on number of participants (on average, USD 20 per webinar for non-member participants)
- Visit the [Webinar Calendar](#)

Be a Pioneer and Bring Innovative Practices to Your Organisation

Participate in new initiatives that are related to your priorities.

Reduce the time of having to do the research yourself. Leverage Fleet Forum's resources and learn and develop solutions together

Vehicle Sharing between NGOs
Lebanon and Central African Republic

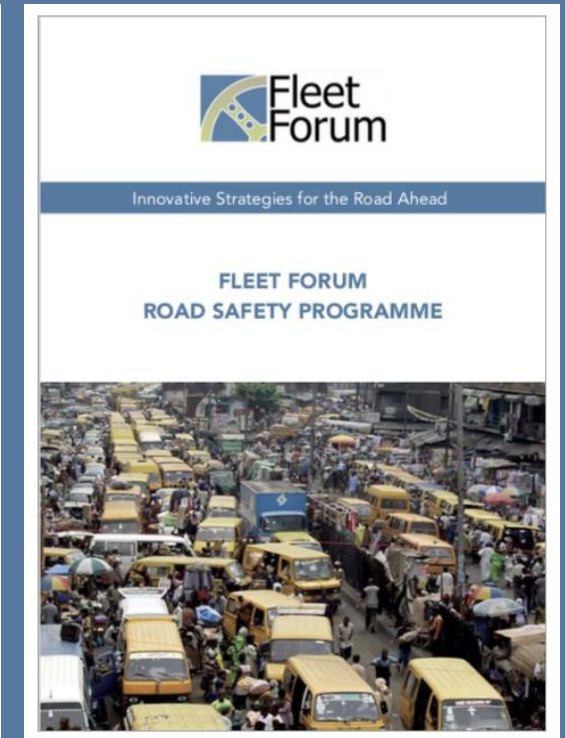

Welcome to Fleet Forum's

GreenMe Platform

Reducing emissions from fleet operations is a priority task for every fleet manager. Fleet Forum's GreenMe platform allows for assessment of the current environmental state of the vehicle fleet, provides actions that reduce emissions and encourages fleet managers to collaborate with the aim to make the fleet environmentally sustainable.

- Fleet Forum has a pool of fleet experts, which you can contract to work on a dedicated project to kick-start or accelerate your fleet transformation
- Consulting support can be 100% virtual, using innovation, change-driven approaches.
- Examples of previous work:
 - WHO fleet management strategy development and pilot implementation
 - Save the Children fleet assessment and business modelling
 - IOM fleet cost savings data analysis
 - WBG and NRC fleet management training
 - WHH and GOAL fleet manual development
