

ARMoured VEHICLE AWARENESS TRAINING

Online training for drivers of civilian armoured vehicles

This course provides drivers with an introduction to the fundamentals of civilian armoured vehicles.

This training goes beyond understanding the specifics of your AV model. You will develop a whole new appreciation for the vehicle as a protection asset and how you can best take care of it.

If you are in the process of operating an AV, this will give you an indepth and practical understanding of the unique characteristics of an AV. In addition, it will give you the knowledge to operate the AV in the most safe and efficient way.

For drivers who are already operating AVs, this training will be a good refresher of what you have might have already learned.

Offered by:

Vehicle types	Civilian Armoured Vehicles
When	Self-paced Start immediately
Format	Online (computer or smartphone)
Online	7 hours, spread over 7 modules
Language	English

\$280 for 7 Modules

By enrolling in this course, the participant has the option to purchase the course with the advantage of completing all 7 modules at a cost savings / or purchase the individual courses. By the end of the training, you will be able to:

- Understand the unique physical components of an armoured vehicle, how it is built and importantly, how it is fundamentally different to a regular non-armoured vehicle;
- Know the basics of the science behind ballistic and blast attacks and therefore how the vehicle is designed and built to protect against these types of attacks;
- Understand how the additional weight of an armoured vehicle dramatically changes the vehicle's mobility characteristics and dynamics;
- Have the knowledge to adjust your driving style and safely manage an armoured vehicle that will weigh more than 5,000kgs;
- Conduct practical safety and maintenance inspections on your vehicles;
- Recognise the importance of scheduled maintenance and servicing of your armoured vehicle;
- Understand the importance of reporting accidents in your organisation;
- Know how you can learn important safety lessons from any vehicle accident.

Why choose this training?

[Driver's Seat](#) is a 100% online training platform, which allows your drivers to gain knowledge at their own pace.

Drivers will receive access for 3 months and managers will receive personalised reports to monitor training completion.

Q&A live sessions

Q&A 1 hour live Zoom sessions led by Armoured Consulting Experts.

They are online open discussions based on topics and questions raised by the participants.

They are an opportunity to:

- Clarify or explore further points that were raised during the online training (discussion supported by online visuals, as needed);
- Trainees can ask technical questions trainees that they may have in relations to their own situation;
- Ensure important messages and points are well understood;
- Decide on the next steps and the implementation of the learning (choose 3 things you want to implement right now).

Category	Nr. Drivers	Price per Driver
Normal	1 - 9	\$ 280,00
Bronze 5%	10 - 29	\$ 266,00
Silver 7%	30 - 49	\$ 260,40
Gold 15%	50 - 199	\$ 238,00
Platinum 20%	200+	\$ 224,00

Group discount

By purchasing modules 1-7 for your drivers, they won't receive participation certificates, instead they will receive a Armoured Consulting-approved Certificate of Completion of the Armoured Vehicle Awareness Training.

In addition, we offer you a discount based on the number of drivers you want to register.

Receive your participation certificate upon completing the course.

The student is required to:

- Progress through all the lectures in order;
- View a minimum of 90% of the video content;
- Complete all the questions in the graded assessment at the end of each lesson (where applicable).

Please note the student is also required to obtain a minimum 60% pass rate to achieve the basic Level 1.

When you have completed the assessment quizzes for this course, you will be awarded a certificate noting your level.

What do our participants say?

"This is well structured course. It gives the required general knowledge required when working and travelling in a civilian armoured vehicles".

"I clearly now understand the logic of some construction designs and solutions used in armoured vehicles. It was also good to better understand about the proper use of terminology and distinction between some of the international standards".
