

Innovative Strategies for the Road Ahead

Fleet Forum Consultancy Packages: Cost Savings

Now is the time to save costs. Work together with Fleet Forum to realise cost-savings!

For many organisations the Coronavirus pandemic has put immediate pressure on operational budgets. Every dollar that your organisation can save can be put towards programmes that support beneficiaries.

Fleet Forum has developed two remote consultancy packages to:

- help you analyse your fleet cost data and identify immediate cost savings;
- analyse your fleet size, identify how you can reduce and make your fleet fit for purpose in the future.

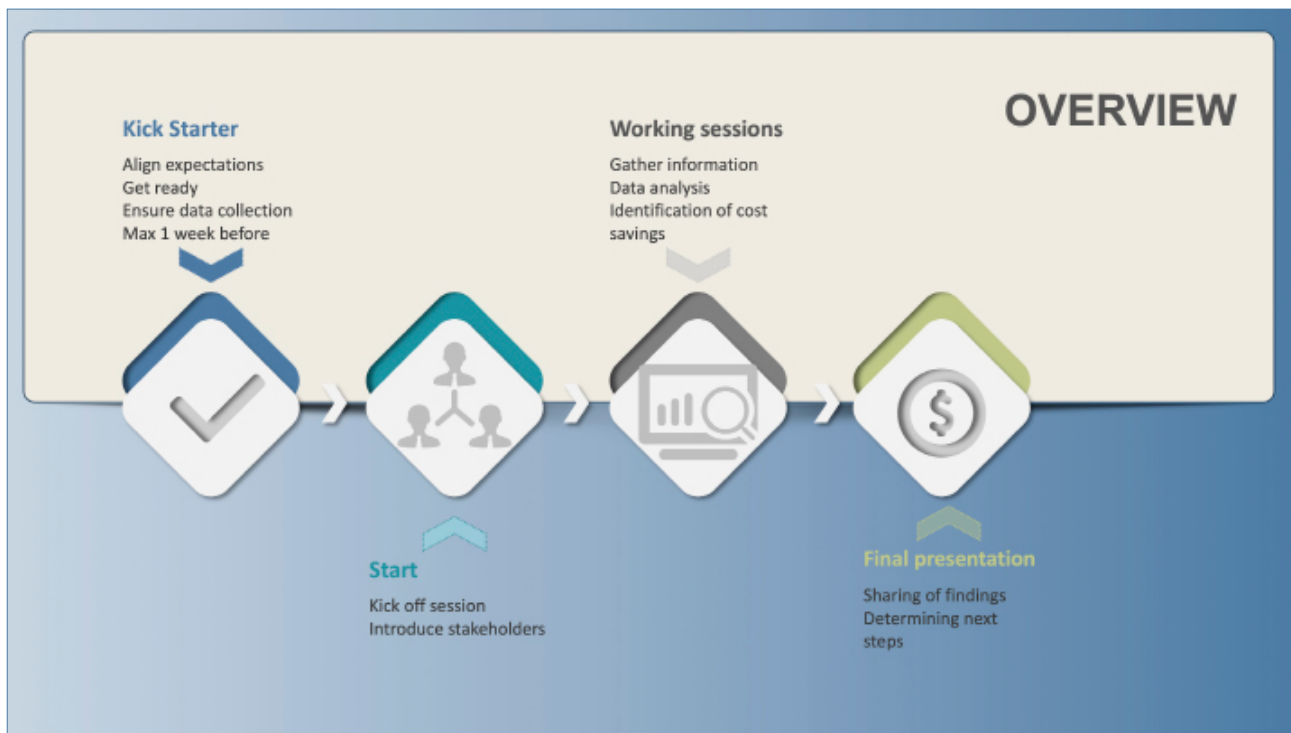

Fleet Forum expert(s) will work together with you and your stakeholders remotely for three days to analyse the costs related to your fleet and identify short and mid-term cost savings and to determine actions to realise the cost-savings. The deliverable in this consultancy is to identify short and mid-term cost savings. The deliverables will be presented in a slide deck.

“We never realised that the age of our fleet had such an impact on the total costs of our fleet”

Fleet Forum will apply its ‘learning approach’. We will not only endeavour to deliver tailor-made advice to the organisation’s context and produce the consultancy deliverables, but also to:

- Engage the leadership of the organisation so that they feel ready to act upon the recommendations of the consultancy
- Create a learning environment so that potential “implementers” can learn from our approach by experiencing what we do

Fleet Forum will deploy the right experts for your challenge or opportunities, which means that you can tackle the challenge or seize the opportunity together with experts with different skill sets throughout the consultancy.

Fleet Forum's expertise in similar projects

In recent years Fleet Forum has supported organisations like the World Health Organization, Save the Children, Catholic Relief Services and UNICEF amongst others to gain insight in the financial performance of their fleet. As outcomes of these consultancies, organisations have implemented (or are implementing) changes to their fleet management model ultimately leading to better insight in cost performance and cost savings.

Budget

Fleet Forum members: The cost for the remote consultancy is €2.750.

Fleet Forum non-members: The cost for the remote consultancy is €3.025.

The consultancy costs are based on three working days needed to execute this assignment as described above. This rate includes telephone costs and all normal desk costs. Fleet Forum is non-profit membership organisation, as such VAT will not be charged.

**"Analysing our fleet data allowed us
to save over 10% on our costs"**
